

Ideas behind implementation

- Tool for non technical person
 - + No need for specialist
 - Easy user interface -> no complex features
- Shearable re-editable package (files)
 - + Collaboration with content creators
 - + Possibility to upgrade content
 - + Self hosted system (no servers needed)
- Multiplatform: phone, browser, VR-headset

Two different video type

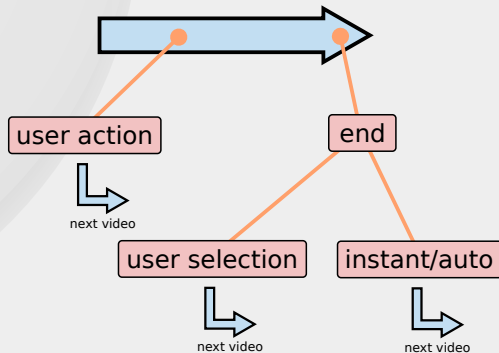

looping video

- no time limit in video
- possibility to monitor the environment

linear video

- story telling
- time limit in video

Different parts
